# From the Rector's Desk

The Republic of North Ossetia-Alania is famous not only for its pleasant climate, captivating mountains and majestic rivers. Everything we have inherited from our ancestors is held in high esteem, therefore we also have a special interest in the education of our young people.

Based on personal experience, I want to advise you to unlock your potential at the North Ossetia State University, the leading higher institution in the region, where a vast range of experience in the preparation of qualified specialists has been accumulated, which resulted in the formation of strong traditions of friendship and brotherhood among the students.

The number of foreign students is increasing, which we contribute to the quality of education students acquire here as well as to the socio-political stability and unity of different ethnicities in the Republic.

We are broadening the spectrum of possibilities for students in an environment where international mobility and exchange is growing. New spheres and

fields are initiated and in the process a wide and diverse network of partnerships is then being formed. To top it all the most hard-working and talented students are awarded substantial bursaries.

Studying with us is interesting, challenging and exciting. Numerous colourful festivals and sport events are held on campus. There are also a wide variety of creative studios operating at the University. Furthermore, students are offered comfortable rooms in our modern student residence.

NOSU is a university with endless possibilities and provides a great start to successful future careers. We don't stand still but continue to move forward on the road of innovative development. Let's step into the future together!

Russia is considered a mystery wrapped inside an enigma, but to experience the depth and thrill of unravelling this mystery it's necessary to visit the Caucasus. Why not start in North Ossetia-Alania? Go to Vladikavkaz, with its tumultuous and fascinating history, ever-present mountains and main artery, the ancient Terek, flowing through it. If you listen carefully you might imagine the voices of history and the sound of horses' hooves and the crossing of swords and sabres in long-past battles in the whispering of the wind or the flow of the river.

The people here are intense, warm-hearted, sincere, hospitable and respectful and protective towards each other. The prerequisites for being happy in North Ossetia is to allow yourself to be stuffed like a Christmas Turkey (it is impossible to think you are going to lose weight here); be willing to stand still and spend time talking and listening to others; slow down your pace and go on a tram ride; start valuing people more than things; don't be shy to express your feelings through dancing, singing, poetry and painting; go for a jog across the bridge over the Terek or a stroll along Prospect Mira and imagine yourself as the main character in an black and white Soviet movie with the sound of City Radio taking you on a nostalgic flight of the imagination as it plays music of bygone years or go on a hike in the mountains and have a barbecue in the forest with friends, new and old. You cannot buy happiness, but you can live in Vladikavkaz and that is very much the same thing.
